

Planting Fruit Trees campaign

Apr - Jun 2023

FRUITFUL OFFICE

Campaign summary

- **Location:** Malawi, Africa
- **Type of trees:** we are focusing mainly on Guava and Papaya fruit trees, as well as trees for firewood like Senna Siamea, Pine and Blue Gum
- **Who benefits:** poor Malawian families benefit from the trees both for income generation and to provide both fruit and firewood for their own consumption
- **Working with:** our friends at Ripple Africa

Visiting farmers who have previously planted trees

- It is always great to visit farmers who have previously planted trees to see the growth and how they are caring for them. The team use this monitoring as an opportunity to train and encourage farmers to coppice branches and tidy up the land to avoid fire risks.
- Elliott Honde has grown 4,000 trees of which some are three years old and others are five years old. He knows the value of growing trees. He said, "I have six children and want to provide a future for them and for my wife."

Elliott with three year old Eucalyptus and his children with five year old Pines
