

Campaign summary

- **Location:** Malawi, Africa
- **Type of trees:** we are focusing mainly on Guava and Papaya fruit trees, as well as trees for firewood like Senna Siamea, Pine and Blue Gum
- **Who benefits:** poor Malawian families benefit from the trees both for income generation and to provide both fruit and firewood for their own consumption
- **Working with:** our friends at Ripple Africa

Focus: Meet our project supervisors

- Angellah and Fraser are Ripple Africa's on-the-ground project supervisors
- Each is responsible for overseeing our tree planting effort in areas of the Choma region (north Malawi)
- Detailed data is compiled at key stages of the annual tree planting cycle – so that we can closely monitor the project's success versus the deliverables: target trees, delivered tubes, germination (in September), growing in tubes ready for planting out (in December), planted out (in March) and survival (after 2 years)

The project supervisors inspect the trees whilst growing in tubes
